Senior Security Cloud Engineer

Experienced senior security engineer in application and cloud security, skilled in automating security controls. Transformed cloud security frameworks, resulting in a 25% efficiency boost. Successfully led cross-functional security initiatives, reducing security incidents. Accomplished in transitioning applications to containerized environments.

WORK EXPERIENCE

Commure

Senior Application Security Engineer

- Developed a Secure Software Development Life Cycle utilizing GitHub Actions and Workflows, enhancing risk mitigation strategies for software applications.
- Integrated advanced security protocols into development pipelines, significantly reducing potential breaches and enhancing early vulnerability correction.
- Automated security controls using scripting, reducing manual workload by 40%, improving efficiency and allowing focus on high-priority security tasks
- Led cross-functional security initiatives resulting in decreased security incidents and vulnerabilities in the codebase.

Stax Payments

Senior Security Cloud Engineer

- Progressed from Cloud Engineer to Senior Security Cloud Engineer, reflecting rapid professional growth and expertise recognition.
- Revamped cloud security frameworks using Terraform, yielding a 25% enhancement in system efficiency and scalability.
- Successfully led security audits, ensuring compliance with industry standards and bolstering the company's reputation for security excellence.

WellSky

Senior Software Engineer

- Led the migration of healthcare applications to AWS, improving scalability and system reliability
- Transitioned applications to a containerized .NET framework on Linux OS, reducing deployment times
- Mentored junior engineers in Terraform adoption, ensuring projects met deadlines and quality standards.

2nd Watch

Sr. Cloud Operation Engineer

- Utilized Ansible Playbooks for consistent system provisioning and integrations, streamlining processes and improving system scalability.
- Influenced product decisions and elevated security standards across the organization by leading security initiatives and collaborating with cross-functional teams, resulting in a seamless and secure digital ecosystem.

Samba TV

Infrastructure System Engineer / SRE

- Utilized Terraform to architect and execute a structured shift to a cloud-based AWS platform, enhancing migration efficiency and system dependability.
- Utilized Ansible Playbooks for consistent system provisioning and integrated Prometheus and Grafana for real-time monitoring, improving system performance and reliability by 25%.

ClearDATA

Cloud System Engineer

- Deployed cloud infrastructure solutions tailored to pharmaceutical and healthcare requirements, enhancing compliance and security.
- Led quality assurance reviews and supported Docker containerization technologies, increasing project deployment efficiency and system resilience by 20%.

Atlassian

Cloud Support Engineer

- Delivered high-quality support for cloud-based applications, ensuring customer satisfaction and resolution of complex technical issues.
- Collaborated with the SaaS team to identify and address recurring problems, contributing to the continuous enhancement of service processes.

CERTIFICATIONS

CompTIA Security+ ce Certification

SKILLS
